Class-NURSERY

**"THE RAIN IS NATURE'S WAY OF ADDING SPARKLE TO THE
DAY AND DIAMONDS TO NIGHT."**

Dear Esteemed Parents,

Welcome back, everyone! We hope you had a fantastic summer break filled with adventures and cherished moments. After the rejuvenating vacation we are ready to dive into new month and we are excited to reconnect and share all the activities and learning opportunities ahead. Here's a glimpse of a great start and productive sessions which we had with our little ones.

ACTIVITIES

TRUMP TO JUMP

Nursery is all about making learning a fun filled experience for kids. A number game activity was organized on 10th July 2024 in nursery wing. To add fun with learning and recapitulate the shapes done so far, Trump to Jump activity was performed by nursery kids. A colourful dice was rolled where shapes were pasted. Children were divided into 4 rows with each shape placed in front of them. Whatever shape appeared after rolling the dice, the child standing in front of that particular shape had to take a jump forward. In the same way the dice was rolled and the child standing in front of the particular shape had to take jumps. This was an excellent integration of gamification in learning.

BLUE COLOUR DAY

On July 12, 2024, the nursery wing of BCM Arya Kindergarten celebrated Blue Color Day. The classrooms and corridors were adorned with blue decorations, creating an immersive experience for the tiny tots. Through engaging activities, children learned to recognize and associate the color blue with various objects. Discussions about color choices fostered cognitive flexibility, while fine motor skills were honed through color puzzles and painting. Overall, Blue Color Day was a holistic learning experience that enriched vocabulary and engaged young minds.

ACTIVITIES

SUPER CHAMP CONTEST

“A Healthy mind lives in a healthy body”

This statement was very well justified by BCM Aryans throughout the week from 8th July 2024 to 18th July 2024. Super champ was an initiative to incorporate importance of health and hygiene. The contest went through various hygiene and fitness test which was done by the panel of doctors and sports teachers. The final round was held on 19th July 2024, which was a performance by the child through rhyme and tips on healthy habits .Titles like sunshine smile, fit and fabulous, bouncy hair ,shiny skin and many more were presented to the students. The participation of students was praiseworthy and the winners of the contest were awarded with trophies and certificates.

BIRTHDAY CELEBRATION:

Birthday celebrations for nursery kids give them an opportunity to celebrate their special day by connecting to traditions and religious practices. On 17th July,24 children celebrated July birthdays with Hawan , seeking the blessings of almighty and their teachers. The day was followed by cake cutting. This ritual in BCM Arya is performed to inculcate moral and social values in each child at their foundational stage.

ACTIVITIES

MONSOON BONAZA

On July 26, our nursery kids enjoyed an exhilarating Monsoon Bonanza. Their excitement was palpable as they entered the premises, clutching their inflatable toys. Water splashes and a refreshing pool provided relief from the warm, sunny day. The kindergarten play area transformed into a monsoon splash zone, surrounded by water. A playful rain shower added to the fun, encouraging spontaneous dance moves and laughter. The juice and snacks corner became an irresistible attraction. Children posed on recliners and slides, capturing picture-perfect moments. Overall, it was a day well spent, brimming with entertainment and joy.

COMPETENCY- BASED ACTIVITIES

In July, various competency-based activities were conducted to enhance the teaching and learning process. These activities were designed to integrate different subjects and skills, providing a holistic approach to education. By merging disciplines and incorporating hands-on experiences, students were able to see real-world applications of their lessons and develop essential skills such as critical thinking, creativity, and collaboration.

TIPS FOR PARENTS

- 
- **During this monsoon season stay focused to home cooking and enjoy scrumptious recipes with healthy ingredients to maintain good immunity.**
 - **The nature get delightful when it rain so contribute by planting trees to make it more beautiful**
 - **Curiosity is the world of creative imagination, so let your tiny tots ask questions and being curious to learn from the world around.**
